## Summary

---

I am an experienced IT professional with over 3 years in the oil and gas industry, where I specialized in end-user support and network configuration. Recently, I have developed a strong foundation in Quality Assurance processes, including requirements analysis, test planning, and test case development. I am proficient in automation tools such as Selenium and have a versatile skill set across multiple programming languages, including Java, JavaScript, and C#. Additionally, I am knowledgeable in SQL for database validation and well-versed in SDLC methodologies, including both Waterfall and Agile, along with the Scrum framework. I am eager to leverage my technical expertise, problem-solving skills, and dedication to contribute effectively as a Quality Assurance professional in your company
